Part III DETAILED ACTION

Notice to Applicant(s)

1. This action is responsive to the following communications: amendment filed on **6/6/2003**.

2. This application has been reconsidered. Claims 63-71 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371C of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 63, 64, 65, 66, 68, 69, 70, and 71 are rejected under 35 U.S.C. 102(e) as being anticipated by Haneda (U. S. 6,243,171).

Art Unit: 2626

With respect to claims 63, 65, 66, 70, and 71, Haneda discloses an image reproduction control apparatus (figure 1) comprising a storage unit using a detachable memory (column 14, lines 30-32), the detachable memory storing a plurality of reproducible images (column 14, lines 56-65) and a reproduction instruction file (which reads on parameter data or order information) (column 15, lines 53-63 and column 18, lines 33-36), including file names specifying one or more images to be reproduced, the file name in an order (figure 17); a reading section for reading the reproduction instruction file (column 18, lines 55-67); a reproduction control section for controlling reproduction of the images by reading the images to be reproduced (column 15, lines 53-63 and column 20, lines 53-67); a display control section (17) for controlling display in a display unit (column 17, lines 46-56) so that a user may confirm whether or not reproduction of one or more images is to be performed (column 3, lines 53-63, column 5, lines 40-50, column 17, lines 46-56, and column 18, lines 5-36 and lines 50-67), the display means displaying one or more thumbnail (reduced) images corresponding to images to be reproduced specified by the reproduction instruction file (column 6, lines 5-16, 31-40, and 51-63; column 7, lines 17-28, and column 19, lines 4-7), and starting the reproduction in accordance with input from a user (the user enters the printing conditions) (column 20, lines 57-67), and performing the reproduction of images to be reproduced after the user confirms that the images specified by the reproduction instruction file are to be reproduced (the images are printed after the order data is read) (column 10, lines 35-44 and column 20, lines 45-67), wherein, in the confirmation, the thumbnail images are reproduced as images to be displayed (column 1, line 57 to column 2, line 4).

Art Unit: 2626

Haneda also discloses determining whether the instruction file is in the detachable memory (column 21, lines 58-67 and column 22, lines 59-61).

With respect to claim 64, Haneda discloses recording the instruction file in the detachable memory in accordance with user input (column 18, lines 25-36).

With respect to claim 68, Haneda discloses the reproduction instruction file (order file) includes one or more reproduction instructions (size or trimming), and one of the instructions is a print instruction (number of copies) (figure 18).

With respect to claim 69, Haneda discloses the display section is operated in accordance with the attachment of the memory (column 10, lines 3-12).

Response to Arguments

5. Applicant's arguments filed 6/6/2003 have been fully considered but they are not persuasive. Applicant submits that Haneda does not teach that a unit displays one or more thumbnail images corresponding to images to be reproduced specified by the reproduction instruction file, or that in confirmation by the user that the specified images are to be reproduced, the thumbnail image are reproduced as image data to be displayed. The Examiner respectfully disagrees. Haneda discloses displaying reduced images of the images to be reproduced specified by the instruction file (column 6, lines 5-63), wherein, in the confirmation, the thumbnail images are reproduced as images to be displayed (column 1, line 57 to column 2, line 4).

Art Unit: 2626

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Wallerson whose telephone number is (703) 305-8581.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-4700.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, DC 20231

or faxed to:

(703) 872-9314 (for formal communications intended for entry)

(for informal or draft communications, such as proposed amendments to be discussed at an interview; please label such communications "PROPOSED" or "DRAFT")

or hand-carried to:
